PORTLAND COMMUNITY COLLEGE

WORKFORCE ANALYSIS REPORT

NOVEMBER 2009

AFFIRMATIVE ACTION/EQUITY OFFICE HUMAN RESOURCE MANAGEMENT INSTITUTIONAL EFFECTIVENESS

PORTLAND, OREGON

INTRODUCTION

This report constitutes Portland Community College's assessment of its workforce as of November 2009. It is intended to assist the college in developing affirmative action activities in the areas where women and minorities are under represented.

The Affirmative Action Office and the Department of Institutional Effectiveness annually receive a workforce analysis from the Department of Human Resource Management, which is compared with labor market availability data as a means to determine utilization of protected class individuals. This process provides the basis for the establishment of placement goals and time tables to correct utilization.

METHODOLOGY

In summary, the college establishes goals and time tables for the selection of protected class individuals by obtaining a workforce analysis, comparing it with labor market availability data, and determining the utilization of women and ethnic minorities.

WORKFORCE ANALYSIS

This analysis is basically a "snapshot" taken of our workforce on November 1, 2009. It includes a separate listing of full-time and part-time employees organized by job group category, gender and ethnic identity. We continue to look at positions in four major categories: full-time hard money (General Fund), full-time soft money (Non-General Fund), part-time permanent hard money and part-time permanent soft money. Additionally, data is presented broken down into female and total minority: African American, Hispanic, American Indian/Alaskan Native and Asian/Pacific Islander.

AVAILABILITY ANALYSIS

This analysis is based on minority and female representation in the relevant labor area from which the college hires its employees. Specifically, this process includes the following two <u>availability factors</u>:

- 1. The availability of minorities or women having the requisite skills in an area in which the contractor can reasonably recruit.
- 2. Percentage of minorities or women promotable, transferable and trainable within the contractor's organization in the specified labor area.

Subsequently, each factor is given a value weight (as a percent of 1.00). This discretionary criterion reflects the importance of the particular factor as it relates to each job group. Consequently, the value weights for each factor may differ between job groups. That is, in order to fairly determine availability for each of the job groups, these have to be properly matched with national, regional, or local area census data. This methodology enables us to use both different values and national census data for the Administrator/Manager and Faculty job groups, and regional census data (Washington, Idaho, Oregon and California) for the Professional Non-Faculty job group. Moreover, the applicant flow data for faculty is further sub-divided to match each of the faculty subgroups: Instructors, Counselors and Librarians.

The AA Planner software lets us customize availability data according to the representation of faculty by academic subject area taught at PCC. This enables us to identify the areas actually being taught and the number of faculty teaching in each area, allowing us to match those numbers by academic area to the availability data.

UTILIZATION ANALYSIS

The utilization of women and minorities is determined by comparing their representation in our workforce with their availability in the labor market. That is, based on the difference in percentages between our current workforce and availability in the labor market, we calculate the number of women and minority positions needed to reach parity. This constitutes the college's goals.

Because labor market availability data is updated annually and because the college workforce changes from year to year, utilization figures also change and goals are adjusted accordingly. (See Appendix C for an illustration of how this occurs.) As a result, you will find as you review the data on the following pages that some goals are lower and some are higher than those established in the last Workforce Analysis. (See Appendix A for comparisons.) As we move close to parity, however, these goals will gradually be replaced by zeros in all categories.

It is important to remember that new hires alone will not necessarily reduce a placement goal in a given job group. For example, if a woman is hired to replace a retiring instructor who is also a woman, the representation of women in that job group will not change (assuming the total number of positions remains the same). Over time, however, parity is achieved and goals are met by <u>redistributing</u> the representation of women and minorities in the college workforce, typically by:

- Hiring qualified women to replace men and/or hiring minorities to replace nonminorities when vacancies occur in existing position or
- Hiring qualified women and minorities to fill new positions. (See Appendix B)

The following sections outline current workforce, labor market availability, utilization information and goals for each job group category broken down by ethnic group and gender.

ADMINISTRATOR / MANAGER

As illustrated in this table, the comparison of the workforce with availability data yielded full utilization of American Indian/Alaskan Natives in all analyzed categories: Full-Time Employees/General Fund, Full-Time Employees/Non-General Fund, Part-Time Permanent Employees/General Fund and Part-Time Permanent Employees/Non-General Fund.

In the Full-Time Employees/General Fund the placement goal for Females is three (3), African-Americans is four (4) and for Hispanics the placement goal is three (3). In the Full-Time Employees/Non-General Fund the placement goal for African-Americans is two (2) and the placement goal for Asian/Pacific Islanders is one (1).

In the Part-Time Permanent Employees/General Fund a placement goal of one (1) for females exists, all other categories are at parity. In the Part-Time Permanent Employees/Non-General Fund categories Females and ethnic minorities are all at parity.

^{*} **Note:** In the calculation of placement goals Total Minority excludes the multi-racial category. A negative number (-x.xx) indicates a needed placement goal in the current work force, based on a comparison of the PCC workforce to labor market availability. Goals are established only when utilization is less than -0.50.

PROFESSIONAL NON-FACULTY

In the Full-Time Employees/General Fund and Non-General Fund category Females are at parity. A placement goal exists in the Full-Time Employees/General Fund at the rate of one (1) for African-Americans and three (3) for American Indian/Alaskan Natives. In the Full-Time Employees/Non-General Fund the placement goal for American Indian/Alaskan Natives is two (2). All other categories in the Full-Time Employees/Non-General Fund are at parity.

In the Part-Time Permanent Employees/General Fund a placement goal of one (1) exists for Hispanics, and also one (1) for Asian/Pacific Islanders. In the Part-Time Permanent Employees/Non-General Fund all categories are at parity.

^{*} **Note:** In the calculation of placement goals Total Minority excludes the multi-racial category. A negative number (-x.xx) indicates a needed placement goal in the current work force, based on a comparison of the PCC workforce to labor market availability. Goals are established only when utilization is less than -0.50.

TECHNICAL / PARAPROFESSIONAL

In the Full-Time Employees/General Fund the placement goal for Hispanics is one (1), for American Indian/Alaskan Natives the goal is one (1), and for Asian/Pacific Islanders the placement goal is four (4).

All groups are at parity in the Full-Time Employees/Non-General Fund.

In the Part-Time Permanent Employees/General Fund the placement goal for Asian/Pacific Islanders is one (1). All other groups are at parity. In the Part-Time Permanent Employees/Non-General Fund all groups are at parity.

GOALS AS OF NOVEMBER 2008 Hiring placement goals based on college workforce data as of November 2008 compared to availability data for 2007-2008.

HIRING ACTIVITIES DURING 2008-2009

To more closely relate hiring activity to goals, the 2008-2009 hiring activity indicates the number of hires between November 2008 and November 2009 for all employee groups.

NOTE:

It is important to remember that new hires alone will not necessarily reduce the placement goals in a given job group. For example, if a woman is hired to replace a retiring instructor who is also a woman, the representation of women in that job group will not change (assuming the total number of positions remains the same). Over time, however, parity is achieved and goals are met by redistributing the representation of women and minorities in the college workforce, typically by

- Hiring qualified women to replace men and/or hiring minorities to replace non-minorities when vacancies occur in existing positions OR
- Hiring qualified women and minorities to fill new positions.

- Hiring qualified women to replace men and/or hiring minorities to replace non-minorities when vacancies occur in existing positions OR
- Hiring qualified women and minorities to fill new positions.

WHY AFFIRMATIVE ACTION GOALS CHANGE

APPENDIX C

Following is a brief illustration of how Affirmative Action goals can change (sometimes quite dramatically) as a result of fluctuations in both labor market availability data and college workforce data. Figures used below are taken directly from the Workforce Analysis as of November 1, 2008 and from the current report as of November 1, 2009.

STEP 1: Calculate the percentage of Females in the PCC workforce for a

particular employee group -- in this case SECRETARIAL/CLERICAL.

	As of 11-1-2008	As of 11-1-2009
TOTAL PCC employees	228	230
Number of Females % in PCC Workforce	187 82.02%	195 84.78%

STEP 2: Compare the percentage of Females in the PCC workforce to labor

market availability for the appropriate job group.

% in PCC Workforce	82.02%	84.78%
% in Labor Market	86.80%	86.80%
DIFFERENCE	-4 78%	-2 02%

STEP 3: Calculate the placement goal by multiplying the DIFFERENCE from Step 2 above

times the TOTAL number in the job group (from Step 1).

PLACEMENT GOAL -10.90-4.64

STEP 4: Convert to a GOAL by rounding.

> **GOAL** 11 positions 5 positions

The primary change that has occurred since the previous year was the increased total of PCC employees in the employee group by 2. This, along with changes within the original group, resulted in a net increase of 2.76% in the PCC workforce for female secretarial/clerical employees between 11-1-2008 and 11-1-2009. While the labor market availability remained the same; the total number of full-time female secretarial/clerical employees increased causing the percentage of total secretarial/clerical employees in the PCC workforce to increase. As a result, the calculated placement goal decreased by 5 positions. Parity would be reached if 5 additional female secretarial/clerical employees were hired and no changes occurred in the number of total full-time secretarial/clerical employees or labor market availability.
